STRATEGIC POSTURE

AI is not a tool — it is the firm's middle and back office.

We run Phase 1 as if we already had a ten-person firm. Every function (origination, compliance, portfolio, fees, LP comms) has an agentic substitute today. The goal of Phase 2 is not to "add AI" — it is to hire senior humans who supervise what AI already does. The goal of Phase 3 is autonomous agents running discrete workflows (NemoClaw for deal execution, OpenClaw for capital markets) under institutional guardrails.

The strategic asset is the EOS itself — the documented spine of skills, sequences, and agents. That is what a future acquirer or LP gets, not just AUM.

I PHASE 1 · FOUNDATION · 0–12 MO | II PHASE 2 · SCALE · 12–36 MO | III PHASE 3 · INSTITUTIONAL · 36–60 MO

PHASE 1 · FOUNDATION · 0–12 MO

Solo execution + skill-based AI

Where we are today · Q2 2026

- EOS surfaces (28 live) ✓
- Notion as system of record ✓
- Stripe + Xero fee SKUs ✓
- Gmail / Calendar / Drive MCP ✓
- 9 Claude skills deployed ✓

PHASE 2 · SCALE · 12–36 MO

AI supervising team + clients

Target commencement · Q1 2027

- First analyst hire (via EOS) ○
- External compliance officer ○
- EA (partial AI + human) ○
- LP portal live (Fund I+II) ◐
- Investor data room (iDeals / Intralinks) ○

PHASE 3 · INSTITUTIONAL · 36–60 MO

Autonomous agents + full compliance

Target commencement · Q1 2029

- AFSL licensing secured ○
- NemoClaw (deal execution agent) ○
- OpenClaw (capital markets agent) ○
- GP/LP fund structure ○
- Regulatory reporting automation ○

- Outreach sequences (Instantly) ✓
- Make.com automation recipes ◐
- Custom dashboard / VPS ◐
- Figma / Canva brand kit ✓
- Linear / Asana project hub ○

50% COMPLETE — ON TRACK

- Agentic quality gate reviews ○
- Delegation frameworks ○
- Sub-agent orchestration ○
- Fund admin integration (Citco / SS&C) ○

0% COMPLETE — PLANNED

- Board governance infrastructure ○
- Full team (8–12 headcount) ○
- Multi-fund vintage rotation ○
- Platform licensing revenue ○

0% COMPLETE — HORIZON

AI Adoption Curve · Capability Ramp

FROM DOCUMENT GENERATION TO AUTONOMOUS AGENTS · MONTHS 1 → 60

01 — MONTHS 1–3 · DONE
Document generation. Memos, one-pagers, emails, term sheets drafted by Claude. Partner edits for gravitas.

02 — MONTHS 3–6 · DONE
Deal analysis + research. Financial models, counterparty research, market intelligence, pipeline triage.

03 — MONTHS 6–12 · NOW
Workflow automation. EOS surfaces instrument every function. Live MCP pulls on every dashboard. Partner operates at 3x pace.

04 — YEAR 1–2 · NEXT
Human-in-loop supervision. First hires ride on top of EOS. AI does the work; analyst supervises and QC's.

05 — YEAR 2–3
Autonomous sub-agents. OpenClaw launched for capital markets outreach. NemoClaw launched for deal execution.

06 — YEAR 3–5
Institutional AI infrastructure. Full agentic stack under AFSL-grade guardrails. Licensed to third-party advisers.

Automation Tier Framework

FROM SINGLE-TRIGGER RECIPES TO AUTONOMOUS AGENTS · RAMP SEQUENCE

TIER 1 — Recipes
Single-trigger automations

One input fires one action — no branching, no judgement.

- New Notion deal → create folder — LIVE
- Stripe invoice paid → Xero match — LIVE
- Gmail "KYC" label → compliance DB — LIVE

TIER 2 · CURRENT — Skills
Context-aware multi-step Claude skills

Claude reads context, loads the right playbook, executes a procedure with judgement.

TIER 3 · NEXT — Sequences
Multi-day automated workflows

Stateful, multi-step, time-aware — cadences, cycles, reporting chains.

- 6-touch investor outreach sequence — LIVE
- 4-touch lender placement — LIVE
- Post-mandate onboarding (14 days) — BUILD
- Monthly portfolio report cycle — BUILD
- Quarterly LP report cycle — PLAN

TIER 4 · HORIZON — Agents
Autonomous Claude instances

Self-directed within a defined scope and guardrail set. Escalate to partner on edge cases.

- NemoClaw (deal execution agent) — 2028
- OpenClaw (capital markets agent) — 2028

HORIZON ARCHITECTURE · PHASE 3

NemoClaw · OpenClaw · The agentic institution

The Phase 3 endgame is two autonomous Claude-powered agents running discrete workflows under institutional guardrails. NemoClaw runs deal execution (term sheet → closing → portfolio). OpenClaw runs capital markets (origination → placement → LP allocation). Each has its own persona, skills registry, decision thresholds, and hard escalation gates to the partner. Together they multiply effective firm capacity by ~5x against a ten-person analog equivalent.

The partner remains the only human in the decision loop at four gates: mandate signing, IC approval, closing authorisation, and LP allocation confirmation. Everything else is agentic with human QC on material divergence.

PHASE 3 · AGENT 1

NemoClaw · Deal Execution

Runs post-mandate workflow: CP tracking, document orchestration, counsel coordination (Simon Ting / Money Penny), closing certification, portfolio onboarding.

PHASE 3 · AGENT 2

OpenClaw · Capital Markets

Runs placement workflow: counterparty targeting (REL-02), teaser/memo drafting, outreach cadence, LOI negotiation, allocation model, investor follow-ups.

PHASE 3 · AGENT 3

ComplianceClaw · KYC/AML

Runs ongoing regulatory adherence: sanctions refresh, PEP screening, AUSTRAC filings, ASIC returns, AFSL audit prep, conflicts log.

PHASE 3 · AGENT 4

PortfolioClaw · Surveillance

Runs post-close portfolio: covenant testing, quarterly LP reports, valuation memos, watchlist, cash flow forecast, fee accrual.
