PARTNER READ · CAPITAL FORMATION POSTURE

The registry is tighter than the raw count suggests. Of the 112 mapped institutions, 41 are actively warm — enough to build a credible syndicate for any mandate up to A$ 250M in one call-round. The concentration risk is real: three private credit funds (Aurora Peak, Northcrest, Stellar Debt) account for 58% of our warm deployed capital. Phase 2 priority is to broaden the syndicate roster on both debt and equity sides by 20 institutions, with specific targeting on Asia-based family offices and European infrastructure funds.
