EOS-32 · FRONT OFFICE · PROPRIETARY ORIGINATION

Deal sourcing is the firm's primary asset. Origination yield is the primary KPI.

Origination is what the firm exists to do — everything else is execution. This surface instruments the machinery behind deal flow: channel-level yield (which routes convert, which don't), the broker and referral network underwriting 55% of pipeline, the sector radar targeting Energy Transition / Digital Infrastructure / Upstream O&G / Critical Minerals / Structured Private Credit, and the 30/60/90-day outbound rhythm driving proprietary origination.

LEADS IN PIPELINE	LEAD→MANDATE RATE	AVG MANDATE SIZE	ORIGINATION YIELD	BROKER NETWORK	INBOUND:OUTBOUND
47	31%	A$145M	A$21k/lead	14	45:55
28 qualified · 19 nurture	Rolling 12mo · up from 22%	Weighted by probability	Fee expected per qualified lead	6 primary · 8 secondary	Proprietary share rising

PARTNER READ

"Inbound gets us A$30-50M mandates. Outbound is where we find the A$150M+ mandates. The firm runs outbound at 55% of pipeline because proprietary origination is the highest-yield channel we have — and it's the one a bulge bracket can't replicate."

Channel yield — the only origination metric that matters — runs at **A$21k expected fee per qualified lead** blended, but the blend hides dispersion. The highest-yield channel (warm referrals from Tier-1 private credit funds and sponsor GPs) sits at A$42k/lead with a 58% mandate conversion. The lowest-yield channel (cold outbound to sponsor buy-side) runs at A$7k/lead with 9% conversion. We operate both, because even the low-yield channel delivers the single largest mandate in pipeline once it converts.

The radar is sector-weighted: Energy Transition (28% of pipeline), Digital Infrastructure (22%), Upstream O&G (18%), Critical Minerals (16%), Structured Private Credit (16%). This reflects a deliberate leaning toward transition and infra — where the capital is flowing — offset by the ballast of Upstream and Private Credit which converts faster and pays sooner. Next-cycle priority: deepen the U.S. sponsor buy-side channel (currently 4 leads, target 15 by Q3), and onboard 3-5 specialist brokers in Japan/Korea to unseat the APAC-ex-AU capacity gap identified in REL-02.

Origination Channels by Yield

9 CHANNELS · RANKED BY EXPECTED FEE PER QUALIFIED LEAD

HIGH YIELD · WARM REFERRAL — A$42k/lead

Tier-1 Private Credit Referrals

Inbound · Warm · 58% conv

Warm intros from Tier-1 credit funds (Aurora Peak, Northcrest, Stellar Debt) passing borrower-side mandates they can't fund but can earn on via fee-split. Highest-quality leads — pre-qualified by a counterpart with skin-in-the-game.

"Every single mandate sourced via this channel has converted. Zero losses. Cultivate — the counterparts asking us back are our most valuable origination asset."

HIGH YIELD · SPONSOR GP REFERRALS — A$38k/lead

Sponsor GP Introductions

Inbound · Warm · 51% conv

PE/infra sponsor GPs referring portco financings they don't want to burn their banking relationships on. Particularly live in infra (Macquarie-adjacent) and digital infra (KKR/EQT portco flow).

"Sponsor flow runs hot when their treasury teams are bandwidth-constrained. Build cadence with 6-8 GP CFOs — quarterly touchpoint discipline."

HIGH YIELD · COUNSEL REFERRALS — A$32k/lead

Legal Counsel Introductions

Inbound · Warm · 44% conv

Counsel (Simon Ting + broader network) referring borrower-side mandates where the lawyer sees a structuring gap. High-signal leads — typically borrowers who've been quoted by a Big 4 or bulge bracket and want an alternative.

"Simon refers ~2 mandates/quarter. Ask him directly — he's on the panel, he should be on the pipeline."

MID YIELD · BROKER NETWORK — A$24k/lead

Tier-1 Project Finance Brokers

Mixed · Semi-warm · 32% conv

Standing broker relationships (14 firms — 6 primary, 8 secondary) across APAC and EMEA surfacing project finance

MID YIELD · THEMATIC AUTHORSHIP — A$18k/lead

Thought Leadership · Research Desk

Inbound · Semi-warm · 28% conv

Thematic research decks circulated through LinkedIn, direct LP/sponsor distribution and the FO-11 thematic desk. Reliable

MID YIELD · EVENT ORIGINATION — A$15k/lead

Conferences & Industry Events

Mixed · Semi-warm · 22% conv

Targeted conference attendance — PEI Infrastructure, SuperReturn, IJGlobal, ADIPEC, Global Mining Investment.

and infra debt mandates. Fee-shared with broker on close. See broker registry below.

"Broker network is the backbone — 55% of qualified leads. Keep it disciplined: one primary broker per sector, no paying-to-play."

for brand credibility, slower for deal flow — but when it converts, the mandates are large and strategic.

"Build the publishing cadence to quarterly per vertical. Research yields leads 60-90 days out, not instantly. Patient channel."

Dense with GP/sponsor CFO coverage. Selective — 4-5 events/year; anything more is tourism.

"Only attend if there's a pre-booked meeting list of 15+. Otherwise it's expensive networking, not origination."

MID YIELD · COLD OUTBOUND (WARM) — A$12k/lead

Sponsor CFO Direct

Outbound · Cold · 18% conv

Highly targeted outbound to sponsor CFOs and corporate development heads via the Instantly/Apollo sequence stack. Pre-qualified by sector fit and known capital need (refi wall, acquisition, capex). Low open-rate, high reply-rate when right.

"The 'warm outbound' paradox: right person, right sector, right moment — replies come fast. Volume-disciplined: max 20 cold touches/week."

LOW YIELD · COLD OUTBOUND (SPRAY) — A$7k/lead

Sector Mail-Shot

Outbound · Cold · 9% conv

Broad-sector automated outreach. Deprioritised but not retired — delivers scale screening for ICP refinement. Occasional whale-sized mandate lands (A$250M+) which single-handedly justifies the channel's presence.

"Run only in automated mode. No partner time on this channel. Filter-first — only escalate warm responses."

LOW YIELD · PORTAL / RFP — A$4k/lead

Sponsor RFP Portals

Mixed · Cold · 6% conv

Portal-based RFP responses for sponsor and corporate mandates. Commoditised and price-driven — we rarely win against bulge brackets. Maintain minimal presence.

"Channel of last resort. Do not target. Respond only when specifically invited and the mandate fits."

Outbound + Relationship Cadence

NEXT 30 DAYS
Quick Wins · Pipeline Acceleration

- Close Titan Offtake · A$8.4M arrangement + success
- Issue IM for Orion · distribute to 18 Tier-1 credit funds
- Run 20-touch cold outbound to NA sponsor CFOs
- Request 2 referrals from Aurora Peak, Northcrest, Simon
- Publish Thematic #3 · Data Centre Capital Cycle
- Attend SuperReturn APAC (25 pre-booked meetings)

60 DAYS
Build Channels · Deepen Network

- Onboard 2 specialist brokers · Japan + Korea PF
- Convert 3 NA sponsor CFOs cold → warm
- Sign one new counterpart referrer agreement
- Refresh broker fee-split memo · 10-15% standardised
- Pilot FO-11 thematic desk as origination channel
- Formalise GP CFO quarterly cadence · 8 GPs

90 DAYS
Strategic · Phase 2 Prep

- Close Q3 at A$50M+ weighted pipeline (from A$45.2M)
- Convert at least 2 mandates from NA sponsor build-out
- Launch Fund I pre-marketing · 5 anchor LP conversations
- Host Ascension Private Credit roundtable (AU, 12 funds)
- Reach 60:40 outbound:inbound ratio
- Commission first-analyst hire (origination support)
