PARTNER-TO-PARTNER READ

LPs don't buy the deal — they buy the machine that writes the report. A tight DDQ library and a clean quarterly cadence do more for fund conversion than any pitch deck. Every answer we've given, every data room we've opened, every LP question we've ever fielded — all of it lives in one library, ready to reload in 36 hours, not 5 days.

DDQ Response Library · 9 Modules

124 canonical answers · ILPA DDQ 2.1 + custom · ready-to-ship

18
FIRM & HISTORY
Entity structure, ownership, track record, team bios, principals, governance, succession, bench strength.

22
INVESTMENT STRATEGY
Thesis by vertical, target returns, deal size, sourcing channels, due diligence process, value creation levers.

14
TRACK RECORD
Realised IRR / MOIC by vintage, loss ratio, concentration, deal-by-deal detail, attribution, benchmark.

16
RISK MANAGEMENT
Model governance, valuation, covenant monitoring, scenario / stress, portfolio limits, concentration risk.

12
COMPLIANCE & REGULATORY
AFSL status, AUSTRAC registration, KYC/AML program, regulatory history, audit, insurance, SOC-style controls.

11
ESG & RESPONSIBLE INV.
UN PRI alignment, TCFD, ESG integration per deal, carbon framework, exclusion list, stewardship, controversies.

13
FEES & TERMS
Management fee, success fee, waterfalls, hurdle, carry, GP commit, expense policy, MFN, co-invest, fee offsets.

10
OPERATIONS & TECH
Service providers, fund admin, custody, audit, legal, IT security, BCP, cyber, data rooms, reporting systems.

8
REFERENCES
LP reference list, counsel references, co-advisor references, lender references, portfolio sponsor references.

"The library is a weapon. When an LP DDQ lands, the first draft back is pre-populated from the library in 36 hours — not because we rushed, but because we already wrote the answer."

Sample DDQ Answers (abridged)

FIRM & HISTORY · Q1.7

Describe the principals and succession plan for the firm.

Ascension Capital Partners is principal-led by Joshua Ting (JT), Executive Managing Partner and Global Head of Alternatives & Private Markets. Phase 1 operating model is principal-executed with institutional AI infrastructure. Phase 2 team build (analyst + compliance + EA) scheduled post-A$500M AUM milestone. Full succession framework documented in Governance Manual §4.2, reviewed annually with external counsel.

INVESTMENT STRATEGY · Q2.14

What are your target returns per vertical, and how are they calibrated?

Private Credit: target net IRR 10-12%, target MOIC 1.3-1.4x (3-4yr tenor). Infra Equity: target net IRR 12-15%, target MOIC 1.8-2.2x (5-7yr tenor). M&A advisory: fee-only (no principal returns). Returns calibrated to Preqin and Cliffwater benchmarks within 1 std dev of vintage median. Methodology in Valuation Paper §3.

RISK MANAGEMENT · Q4.9

Describe your valuation governance and independent check protocol.

Valuation governed by 4-tier Model Governance Ladder (Tier-1 critical through Tier-4 internal). All Tier-1 marks pass through Independent Valuation Agent (Kroll IVA, A&M, Ryder Scott, SRK — engaged by asset class). IVA memo is pre-invoice and pre-distribution gate. 75bps discrepancy tolerance with formal exception register. See Model Risk & Valuation Framework (IR-EOS-34).

FEES & TERMS · Q7.3

Describe your fee structure and how fees are disclosed to investors.

Fees are structured as standardised SKUs: Arrangement (ARR), Success (SUC), Mobilisation (MOB), Placement (PLC), Retainer (RET), Equity Earnout (EQY), Cash Strip (CSH), Tail (TL), Setup (SET). Every SKU has a fixed basis and disclosure card. Fees disclosed in mandate LoE, IC memo, term sheet, and LP notice prior to any deployment. Full fee taxonomy in Commercial Framework §2.

COMPLIANCE · Q5.4

Describe your KYC/AML and sanctions-screening program.

ESG · Q6.5

How do you integrate ESG considerations into investment decisions?

KYC/AML mandatory on every counterparty before engagement. Four-tier risk rating (Low/Medium/High/Prohibited). Sanctions screening against OFAC, UN, EU, AUSTRAC, UK HMT lists. Enhanced DD for PEPs, high-risk jurisdictions, complex ownership structures. AUSTRAC reporting obligations tracked. All files in Notion AML/KYC DB (ID: 3dec0cb7-7a51-4f22-9cfd-0df94e645c04) with 7yr retention.

ESG integrated at three gates: (1) origination — exclusion list at intake; (2) diligence — ESG rider in every IC memo; (3) monitoring — TCFD-aligned quarterly reporting. UN PRI signatory pathway Phase 2. Energy Transition vertical ESG-positive by design. Full ESG policy in Responsible Investment Framework, reviewed annually.
