MONITORING

DECISIONS NEEDED (BY FRIDAY)

Partner Capacity

WEEKLY HOURS

Deal Execution	24h / 30h target
Origination & BD	12h / 15h target
Client Coverage	10h / 10h target
Firm / Governance	6h / 5h target
Strategic / Deep Work	3h / 8h target

Signal: capacity is over-weighted to execution and under-weighted on strategic / deep work. Defer firm admin (AI-able) and push at least 3h/week into investment thematics & fund architecture. Hire trigger moves forward if this pattern holds > 3 weeks.

- AUD/USD — tracking for FX hedge triggers on 3 mandates
- Private credit spreads — 25 bps wider since last IC
- AFSL pathway — timing for Phase 3 authorisation
- NemoClaw/OpenClaw agent architecture build-out

- Take / pass on the Lyra private credit co-arranger seat
- Hire trigger — first analyst now, or Q3?
- Accept Sirius Infra mandate at reduced retainer?
- Polaris Renewables — exclusive vs. non-exclusive?

Watchlist

RISK / ESCALATION

RED **Vega GSA — commit slip.** Counterparty cooled. Re-scope or withdraw to protect brand.

AMBER **Polaris — non-exclusive clause pressure.** Sponsor pushing off-market. Hold line or walk.

AMBER **KYC backlog — 3 pending.** Cannot bill until cleared. Chase compliance today.

RED **Capacity — deep work at 38%.** 3+ week pattern → pull hire trigger forward.

AMBER **Lyra co-arranger decision — Friday.** Economics modest; brand-positive for PC lane.

Standing Principles

JT'S NORTH STAR

01 · Protect Economics

Promote upside participation. Refuse unpriced risk transfer. Every ACP-FEE SKU justifies its existence.

02 · Preserve Control

Governance rights consistent with our role. Information rights, consent rights, reserved matters held as standard.

03 · Clean Lines

Reputational & regulatory. KYC non-optional. Never engage without clearance. Counsel routed correctly every time.

04 · Preserve Optionality

Future capital formation and strategic exits. Don't foreclose fund launch, AFSL authorisation, or partnership pathways.
